# ADEK VIT

Our product is a powerful supplement designed to address deficiencies in vitamins A, D3, E, and K, which can occur as a result of various stressors such as coccidiosis, debeaking, vaccination, diseases, and transportation. By providing a potent blend of these essential vitamins, our supplement supports overall health and wellness in livestock and poultry.

It helps to promote weight gain, egg production, and eggshell quality in layers and breeders, as well as fertility and hatchability in breeders. Additionally, our supplement can help to make up for blood loss and support the immune system, helping your animals to recover from stressors and maintain optimal health.
